⬜ Automatically converts keyboard keystrokes to shortcuts. Automatically converts keyboard keystrokes to shortcuts. This key macro recorder and extension creates a shortcut for each macro keystroke that you type. You can edit any keystroke before you create the shortcut. You can set a keyboard shortcut to open/close the shortcut pane. The pane also has a text box,

which you can use to enter the name of a command. Keyboard shortcuts can be as simple or as complex as you want. For example, you can set keyboard shortcuts for open or close a file, open a folder, create a new folder, etc. Keyboard shortcuts can also perform other tasks, such as creating a document, creating a link, or saving a file. Keyboard shortcuts are a great way to easily open or close a program or document, or

perform other functions. Macros can be recorded in a variety of applications. Some applications let you record multiple macros at once. Others have a limit to the number of macros you can record. The keyboard shortcuts that you create are saved in a file that you can open in any application. You can open and modify the shortcuts you created anytime. For example, you can re-record a macro if you make a

mistake. To edit a shortcut, simply double-click it in the list. How To Use: ⬚ When the pane opens, click on the keyboard shortcuts area in the bottom right corner of the pane. ⬚ From the toolbar, click on the Macro button or the Add button. ⬚ The Macro window will appear. ⬚ Start recording a macro by typing its name, and press the Macro button. ⬚ The macro recorder will enter the command sequence for you. ⬚
